

TABLE OF CONTENTS

Introduction	5
Aims	7
1. Research into perception and meaning of colour	9
1.1. Cognitive semantic research into basic colour terms	9
2. Theoretical framework for this study	17
2.1. Meaning in cognitive semantics	17
2.2. Categorisation and categories	19
2.3. Representation of categories	27
3. Methodological principles	29
3.1. Scope	29
3.2. Material and tools	30
3.3. Corpus characteristics	31
3.4. Methods and procedure	32
3.5. Anticipated problems and actual limitations	35
4. Basic colour terms in corpus statistics	37
5. English and Polish BCTs in comparison and contrast	43
5.1. The categories of <i>black</i> and <i>czarny</i>	43
5.2. The categories of <i>white</i> and <i>biały</i>	89
5.3. The categories of <i>red</i> and <i>czerwony</i>	131
5.4. The categories of <i>green</i> and <i>zielony</i>	163
5.5. The categories of <i>blue</i> and <i>niebieski</i>	191
5.5.4. The category of <i>błękitny</i>	220
5.5.5. The category of non-basic <i>siny</i>	224
5.5.6. <i>Niebieski</i> , <i>błękitny</i> and <i>siny</i> in comparison	227
5.6. The categories of <i>yellow</i> and <i>żółty</i>	233
6. Concluding remarks	263
6.1. Prospects for further research	267
